Please note that the contents may be substituted at any time with a product equal or superior to that specified.

LF - Lightfastness rating

Lightfastness refers to the chemical stability of a pigment under long exposure to light. Made from the finest raw materials and the purest pigments, all colours comply with internationally recognised lightfast testing standard ASTM D6901. A scale of 1 - 5 is obtained with values 1 and 2 considered to be highly lightfast.

Colours will not fade at these values for up to 100 years under museum conditions.
