## Colour Index

The pigments used in Van Gogh paint have been indicated according to the Colour Index. The Colour Index is an internationally used system for pigments and dyes that have been used in all types of paint (therefore also in artists' paint). The system is based on a number and name associated to the chemical structure. Originally the Colour Index was developed the U.S.A., hence the use of English descriptions of the chemical class. The abbreviations mean the following:

- PW = pigment white
- PO = pigment orange
- PB = pigment blue
- PG = pigment green
- PBk = pigment black
- PY = pigment yellow
- PR = pigment red
- PV = pigment violet
- PBr = pigment brown
