[Appropriate storage method for Copic-artwork]
 Keep it away from direct sunlight/ultraviolet rays as much as possible. Store in a dry, cool dark place.

[About the combined use of Copic and other art materials]
 Always check the compatibility before start your project.

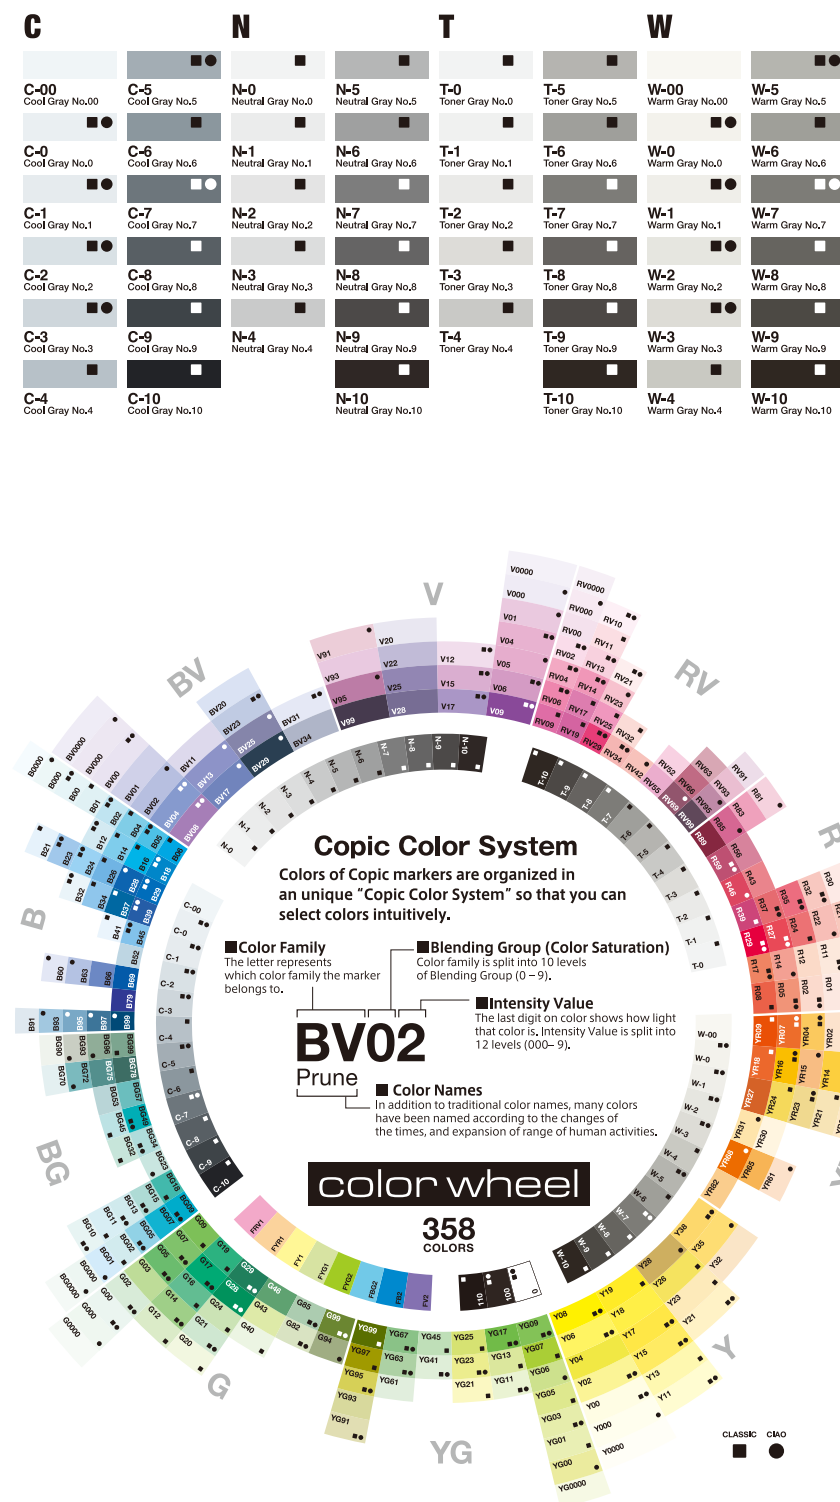

※ Characteristic of dye ink: Dye is artificial material made through chemical processes and it's not as archival as pigment products. Dye has a material property of discoloring itself. Also dye is susceptible to ultraviolet rays and high temperatures, in general. Copic ink is dye ink and if artwork with Copic is exposed to direct sunlight or fluorescent light, ink will gradually fade and color will change.

Classification of Color Family
 Chromatic colors are split into 10 basic levels (0-9).
 The color family E represents earthy/brownish colors.
 The Earth colors were separated as specific group to select the colors intuitively.
 Although gray is actually an achromatic color, Copic makes many different shades of gray, in four color families.
